**Amendment to the Drawings**

The attached sheet of drawings includes changes to Fig. 2B. The sheet, which includes Figs. 2A and 2C, replaces the original sheet including Figs. 2A to 2C.

Applicant has amended Figure 2B to extend the line relating to reference numeral 38 to the second side wall of the motor boot. Applicant respectfully believes that the reference numeral 38 in Figures 2A and 2B now point to the same feature.

Applicant has not amended Figures 3A and 4C since Applicant respectfully believes that the reference numeral 56 points to the same feature. In Figure 3A, the reference numeral 56 relates to the mobile communication device frame in its entirety and in Figure 4C, the reference numeral also relates to the frame in its entirety. Since the view of Figure 4C is a cut-away view, the frame is shown as a cross-section which Applicant has referenced as 56. As outlined in the specification at paragraph 21, the entire mobile communication device is referenced as 56 rather than just a specific portion of it.

Since this response is being filed by facsimile in order to meet the deadline, Applicant will file a copy of this response with the USPTO on Monday in order to provide the Examiner with a non-faxed version of the replacement sheet.
